

Investments Options With WealthCare Saver HSA

Fund Lineup Summary

Managed

The Managed path is comprised of a series of risk-based models that are matched to a specific account holder's risk profile and/or age. Model portfolios are managed by CAPTRUST, the registered investment advisor, and based on criteria that are risk-based and target a certain percentage of equities, fixed income, cash equivalents, and other asset classes. Under the management of CAPTRUST, the model portfolio and its underlying investment holdings will be re-balanced, re-allocated, and/or the underlying investment holdings may change based on capital market factors and other investment decisions.

Self-Directed

The Self-Directed path is comprised of Exchange Traded Funds (ETFs) spanning multiple asset classes that were carefully curated by CAPTRUST, the registered investment advisor. Investors in this path choose how to allocate their invested balance across the available options, and they can update their allocations at any time. CAPTRUST actively monitors the available options, ensuring that investors have the opportunity to build a well-diversified portfolio using a broad set of index ETFs. The number of options available was intentionally chosen to provide broad value while also maximizing and empowering consumer choice.

Brokerage

The Brokerage path is comprised of S&P 500 Index stocks and over 1,000 of the largest ETFs in the market. With the Brokerage option, fractional trading up to 8 decimal points is offered enabling ownership of high-value investments like Amazon, Apple, or Berkshire Hathaway for as little as a penny.

Read on for a summary of each of the funds.
